

Transportation Staff Meeting

January 14, 2015
2:00 PM
CMGC 601

AGENDA

1. CTP Database for Public Involvement (Bridges)

Purpose:

Staff is requesting recommendations on what specific descriptors (fields) to add to the CTP dataset, considering availability of data sources and time commitment.

Background:

- A public comment period for the MPO's first CTP is planned for Spring of 2015. The data currently included in our CTP 'dataset' includes standard descriptors such as street name, facility type (minor thoroughfare, boulevard, etc.), and status (existing, needs improvement), among others.
- In order to satisfy the true intent of the public involvement effort, staff should consider enhancing the available information in this dataset – including, but not limited to: maintenance responsibility, preferred cross section, estimated project cost, funding source, SPOT ID#.
- Due to the upcoming schedule and more than 3000 features in our dataset, we need to balance our data desires with the related time commitment.
- Staff will need to discuss the time commitment and level of effort/resources involved in enhancing the CTP dataset for public involvement and beyond.

2. Draft TIP (Burke, Cook)

Purpose:

Continue the discussion of the draft TIP.

3. U-5526 Project Limits Administrative Error (Basham)

Purpose:

Discuss minor correction to projects limits description in the TIP. The change will not affect the overall project.
