REPORT TIMETABLE FOR DISEASES/CONDITIONS (for a complete listing of NC Reportable Disease, please call 919-715-7404)

niuniunteu diseases	Category A Bioterrorism Agents/Diseases <sup>4</sup> (report immediately by phone) Disease/Condition with Pandemic Potential (report immediately by phone)						
**	Reportable within 24 hours after the disease or condition is reasonably suspected to exist. (by phone and form)						
All Other Conditions	All other conditions, report within 7 days, (by form)						

<sup>\*\*\*</sup> Newly created category combining two or more reportable diseases/conditions. Five-year averages are currently unavailable.

## TO REPORT DISEASES BY TELEPHONE:

Animal bite consults: Al Piercy 704.336.6440

General Diseases including Hepatitis B: Belinda Worsham 704.336.5498 Jane Hoffman 704.336.5490 Beth Quinn 704.336.5398

Penny Moore 704.353.1270 Freda Grant 704.336.6436

Sexually Transmitted Diseases and HIV/AIDS: 704.432.1742 Suspected Foodborne Outbreaks: Bill Hardister 704.336.5533

Tuberculosis: Kristi McCray 704.432.2496

Report forms can now be found on-line at: http://www.charmeck.org

1 The cumulative number for HIV Disease is 6,510 in Mecklenburg County and 37,115 in North Carolina. This figure is based on reports of confidential testing done between January1990 - December 2009. Please note a change reflecting recent changes in North Carolina reporting, "HIV Disease" refers to all people infected with human immunodeficiency virus, with and without an AIDS defining condition. Previously data were reported separately for HIV and AIDS. Currently AIDS cases are subset of HIV disease. AIDS case reporting began in the United States in 1981 and North Carolina in 1984. HIV infection reporting begin in North Carolina in January1990 and HIV disease reporting in 2001.

2 STD Surveillance data systems have undergone extensive changes as North Carolina implements NC EDSS (North Carolina Electronic Disease Surveillance System). Morbidity counts will likely change as data are reviewed, existing data systems are merged and previously unreported cases are entered into NC EDSS. Increased STD reports during the month of March generally represent older diagnoses, some dating back many years, which were recently entered into NC EDSS.

3. Rabies: 1 raccoon, 1 coyote

4 Category A Bioterrorism Agents/Disease including pathogens that are rarely seen in the United States and that pose a risk to national security because they can be easily disseminated or transmitted from person to person; result in high mortality rates and have the potential for major public health impact; might cause public panic and social disruption; and require special action for public health preparedness.
