NOTE: These totals include offenses reported to the Charlotte-Mecklenburg Police Department in accordance with the Uniform Crime Reporting Program. Totals for homicide do not include cases investigated by the police but classed by UCR guidelines as negligent manslaughter or as 'justifiable homicide.'

Late adjustments to previous months through unfoounding, reclassification and late entry may affect monthly totals. Adjustments such as these are part of standard UCR procedures; while they may cause some exceptions in month to month comparisons, the differences in comparisons over longer periods (e.g., yearly comparisons) are accommodated in UCR reporting. (See p.20 of this report)

\*\*Clearance totals and rates in this report for January -May, 2002, are not complete due to delays in processing some clearances and to work on the clearance reporting programs. Clearances missing from the current totals will be added as they are processed in later monthly reports this year (after June).

NOTE: Clearances are reported in accordance with Uniform Crime Report guidelines. Since clearances are not counted until they are entered into the Records system, any delays in processing may result in some clearances being reported in succeeding months.

## Year-to-date Index Offenses by Type

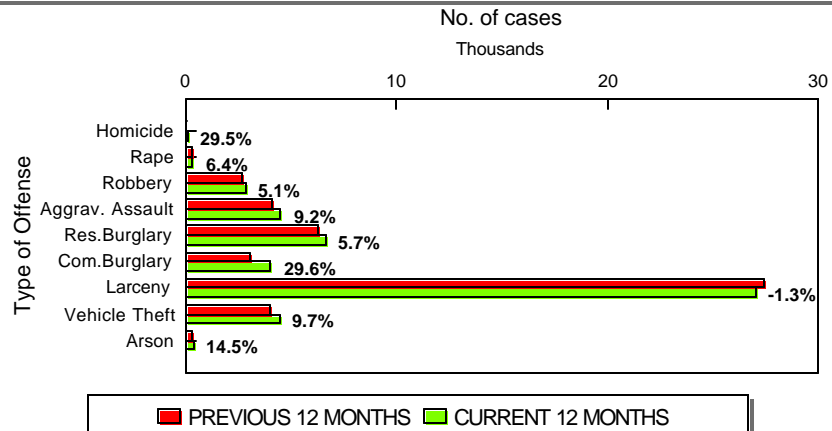

Charlotte-Mecklenburg Police: 2002

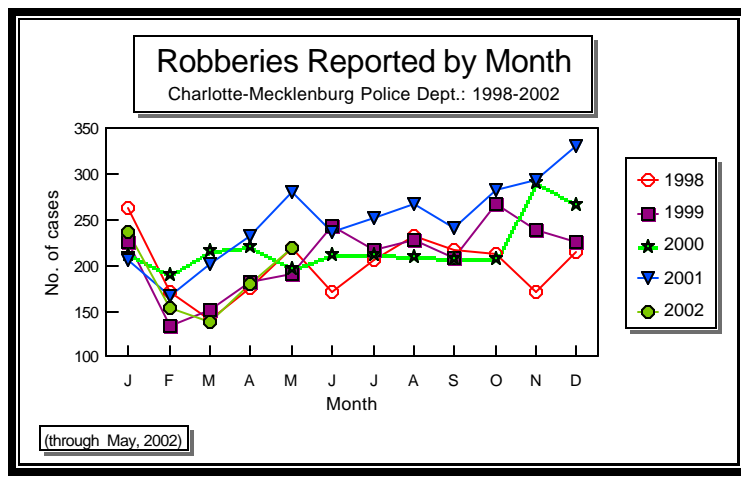

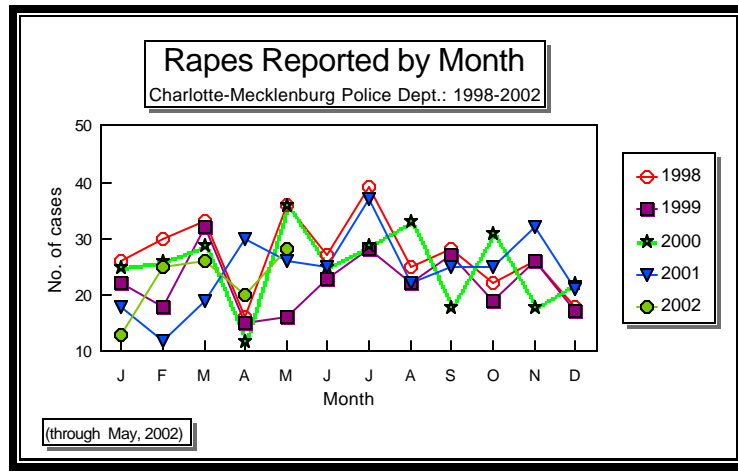

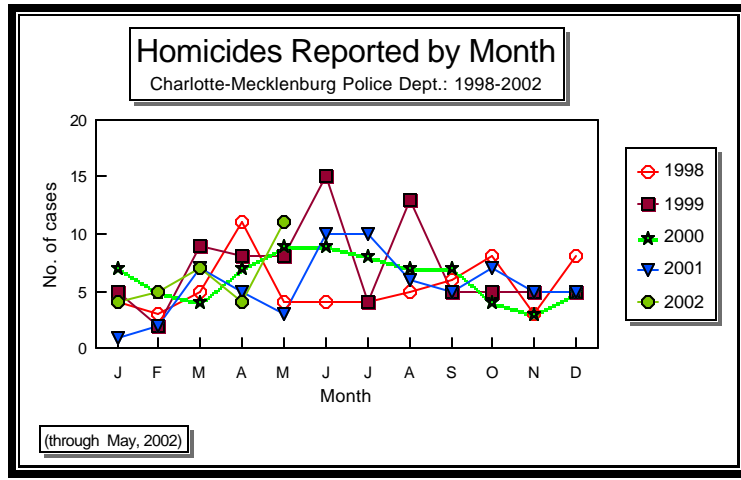

(through May, 2002)

## Index Offenses in Current and Previous 12 Month Periods

Charlotte-Mecklenburg Police Department

**Index Offenses Reported by District and Service Area of Occurrence**  
**West Service Area: Jan-May, 2001-2002**

This data is based on the district configuration adopted Nov. 8, 2000.

\*Percentage changes that cannot be mathematically calculated are listed as "ERR."

Totals in these district summaries are based on the current district configuration adopted in Nov., 2000 and the monthly Uniform Crime Reports (UCR); the data does not include a small number of offenses in which the location of the offense was unknown or was entered without a valid tract assignment. Districts are not equal in geographic size, demographics, zoning/development, and other factors that influence the rate of crimes committed in an area. Therefore, the comparison of raw offense totals across districts is not advisable.

**Index Offenses Reported by District and Service Area of Occurrence**  
**Northeast Service Area: Jan-May, 2001-2002**

This data is based on the district configuration adopted Nov. 8, 2000.

\*Percentage changes that cannot be mathematically calculated are listed as "ERR."

Totals in these district summaries are based on the current district configuration adopted in Nov., 2000 and the monthly Uniform Crime Reports (UCR); the data does not include a small number of offenses in which the location of the offense was unknown or was entered without a valid tract assignment. Districts are not equal in geographic size, demographics, zoning/development, and other factors that influence the rate of crimes committed in an area. Therefore, the comparison of raw offense totals across districts is not advisable.

**Index Offenses Reported by District and Service Area of Occurrence**  
**East Service Area: Jan-May, 2001-2002**

\*Percentage changes that cannot be mathematically calculated are listed as "ERR."

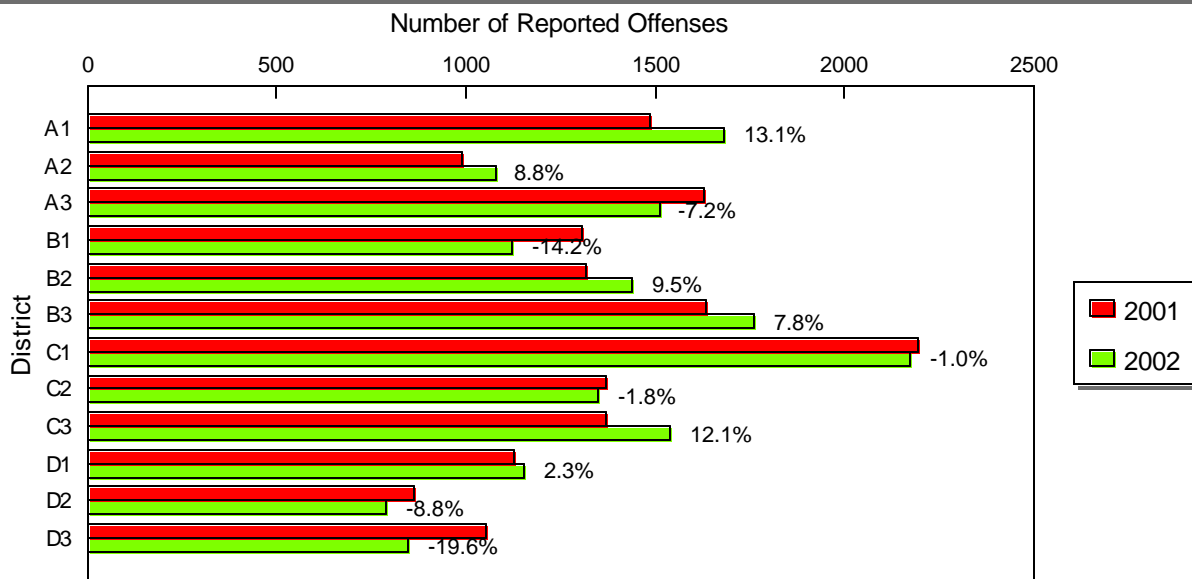

Totals in these district summaries are based on the current district configuration adopted in Nov., 2000 and the monthly Uniform Crime Reports (UCR); the data does not include a small number of offenses in which the location of the offense was unknown or was entered without a valid tract assignment. Districts are not equal in geographic size, demographics, zoning/development, and other factors that influence the rate of crimes committed in an area. Therefore, the comparison of raw offense totals across districts is not advisable.

| <b>TOTAL Collisions</b>    | <b>14793</b> | <b>13522</b> | <b>-8.6%</b> |

\*The number of fatal collisions and the number of persons killed in those accidents is taken from the HITS unit files. Their records are updated for deaths that occur after the initial report is filed. These numbers also include deaths where a medical condition (e.g., heart attack) may later be found to have caused the accident and/or the death involved in the accident. Fatality figures published in earlier reports may not include these two types of cases and are therefore not directly comparable.

**TRAFFIC COLLISIONS REPORTED BY TYPE  
CHARLOTTE-MECKLENBURG POLICE DEPARTMENT: 2002 (Year-to-Date)**

Includes accidents classed as fatal due to deaths after the initial report; injury and property determinations are based only on the data in the initial report at the time of the accident.

**TRAFFIC COLLISIONS REPORTED BY CHARLOTTE-MECKLENBURG POLICE DEPARTMENT  
BY LOCATION OF ACCIDENT (DISTRICT): 2001-2002 (Year-to-Date)**

Year-to-Date through May

Uniform Crime Reporting Procedures:

The Charlotte-Mecklenburg Police Department reports offense and arrest statistics in accordance with standard Uniform Crime Reporting (UCR) guidelines. UCR policy states that any adjustments to previous months can be made on the current month's report:

...In tabulating crime counts, an agency may find that offense totals for past months require adjustments due to developments in the investigation or other handling of the matter. It may be necessary to adjust totals reported to UCR for the past month or prior months. Needed adjustments can be made on the current month's report and do not affect the reliability of the figures in that such adjustments tend to equalize each other from month to month over a period of time.

- "Uniform Crime Reporting Handbook," FBI, 1984, p. 42-43

We are required to report crime monthly to the UCR program, and we do therefore make an effort to process monthly changes in a timely manner. However, occasionally due to the review and processing required for reclassifying, unfounding or clearing cases, the current month's totals may reflect the processing of a backlog of these changes from previous months.

Users of the data are cautioned that conclusions about substantial changes in crime trends or in clearance rates based on only a single month's data or trend may reflect some of these adjustments. For this reason, in addition to the monthly and year-to-date trends on Page 1, the monthly report routinely includes a comparison for the previous 12 months (p. 4), as well as graphs that provide seasonal/monthly comparisons over a five year period (p. 5-8).

We do make an effort to present the most accurate information available at the time this report is published. However, errors in compiling the charts do sometimes occur, so please notify the Research, Planning, and Analysis office if you have any questions about the data in this report.
