

Mecklenburg County

2011 Revaluation

Mecklenburg County is

revaluing all real property for 2011

North Carolina law requires each county to reassess its real property at least every eight years

The last time Mecklenburg County reassessed was in 2003

In Reassessing Property,

the Assessor's Office Meets

Two Requirements:

Market Value & Equity

Market Value

Properties are appraised based on the *most probable price* that each property would bring in an open market

Properties are assessed in fairness so that no property or group of properties is undervalued or overvalued relative to other properties

- Real estate markets are not static. The desirability of different neighborhoods has changed since the Revaluation in 2003
- Some neighborhoods have experienced spikes in sales prices; others have seen modest increases, while others have declined in value
- The Revaluation is done to reflect the current values in different neighborhoods so that property taxes can be applied fairly
- The Assessor's Office measures equity by reviewing the assessment/sales ratio in neighborhoods

Common Concerns

"The Revaluation is done to raise the tax base."

The Assessor's Office has no target valuation. If the market fell in every single neighborhood in the County, the assessments would be lowered as well.

Common Concerns

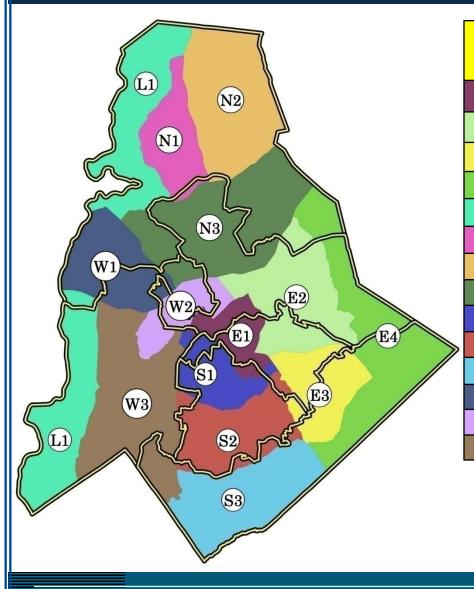

"The Assessor's Office doesn't take foreclosures into account." Bank sales aren't typical arm's length sales; but in neighborhoods where bank sales are more than 15% of the total number of sales, their impact on the market is factored into the assessments.

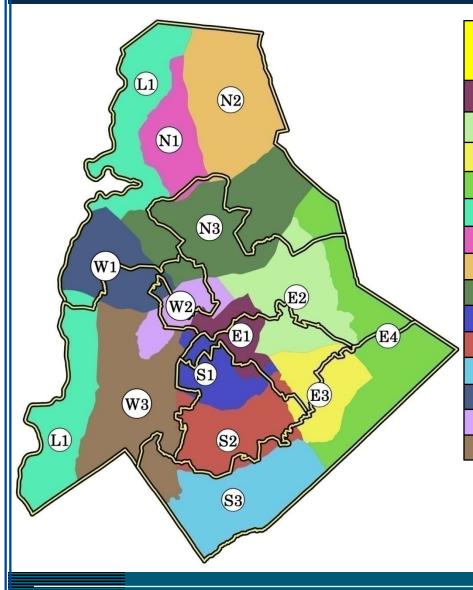

Common Concerns

"A computer algorithm came up with my value. Nobody looked at my property."

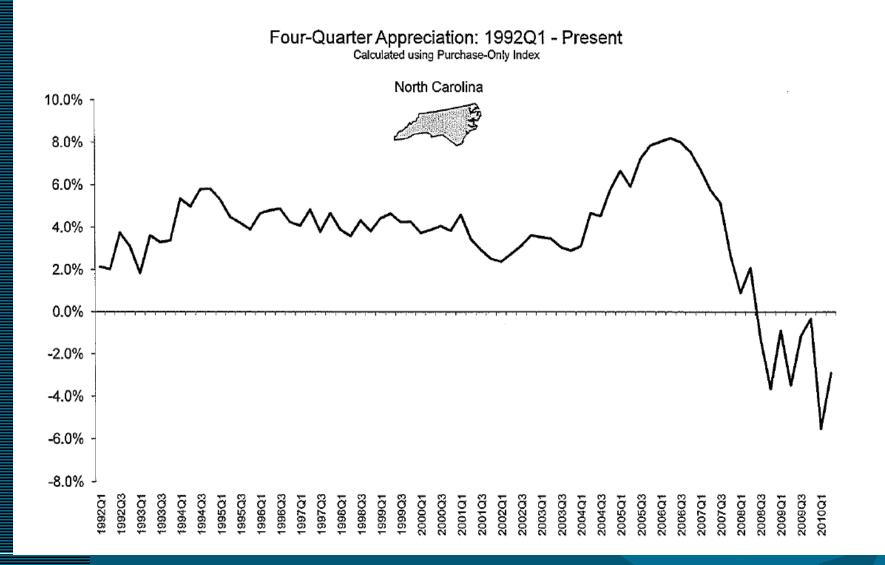

While the Assessor's Office uses technology to enhance the property review process, the final valuation decision is made by a highly trained veteran appraiser.

Assessed Value Actual Sale Price =

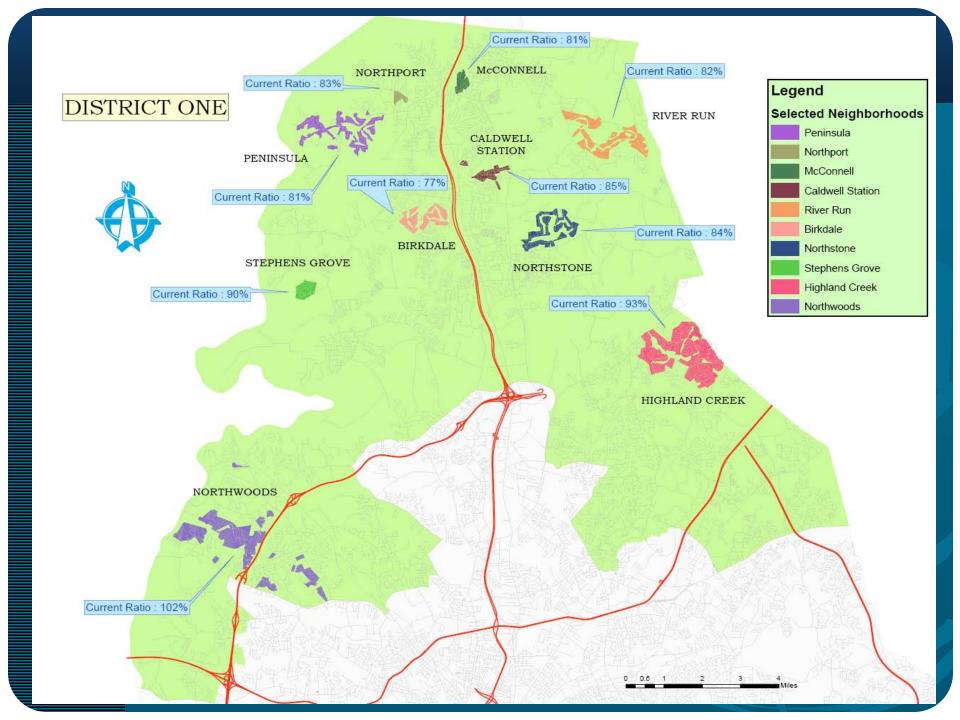

Assessment/Sale Ratio

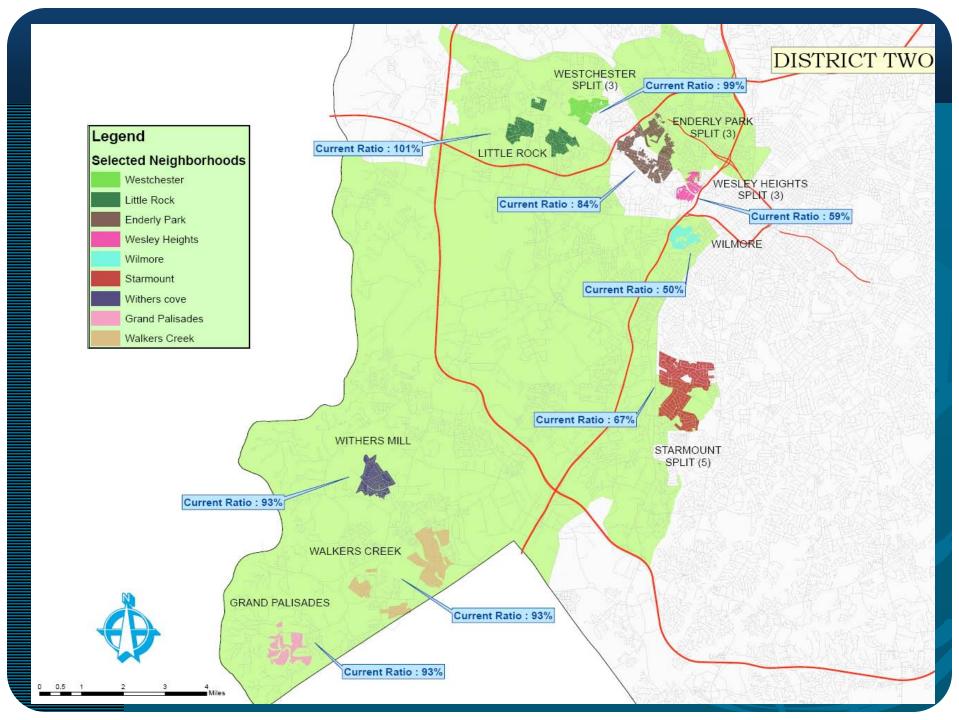

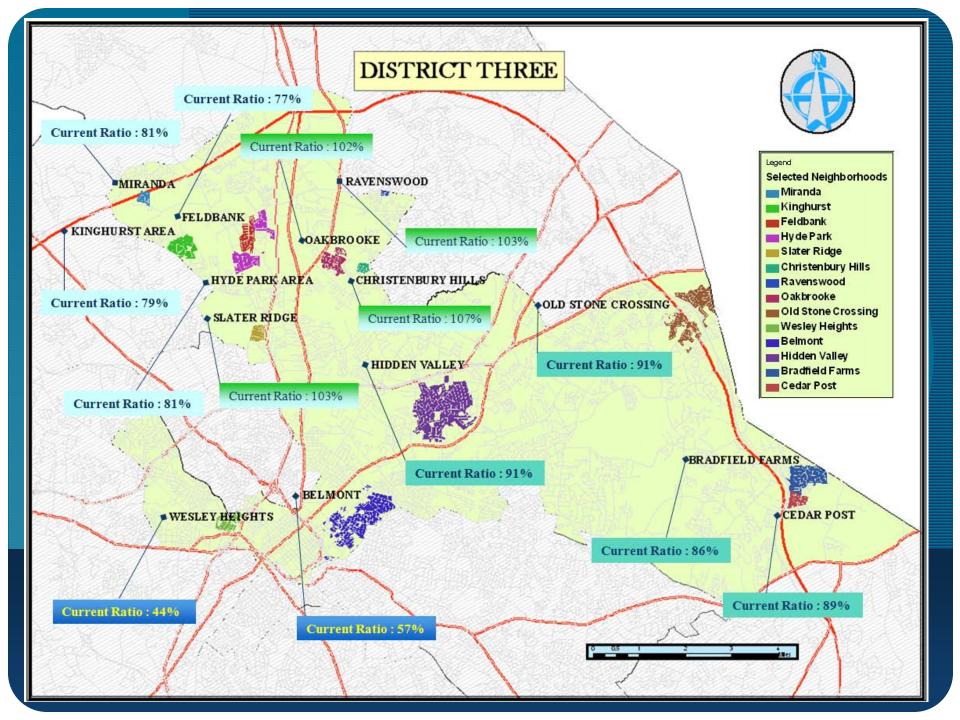

Assessment/Sale Ratio

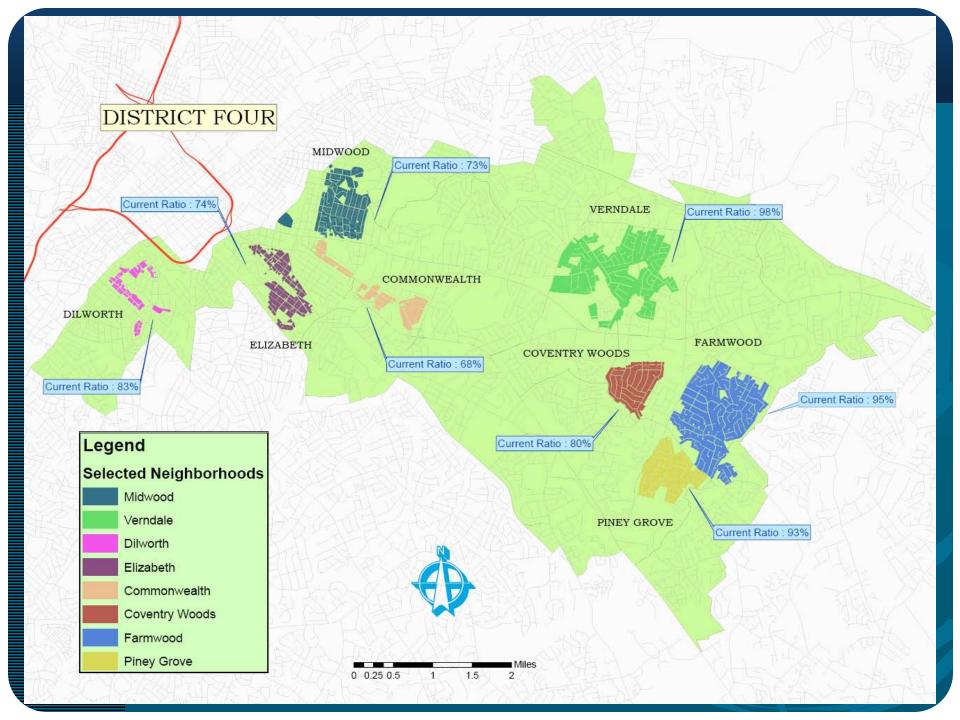

- The median ratio can be calculated for each neighborhood
- In neighborhoods where sales prices have *increased* since 2003, the ratio falls to some number below 1.00
- Where sales have remained unchanged since 2003, the ratio stays near 1.00
- Where sales prices have *fallen* since 2003, the ratio is greater than 1.00

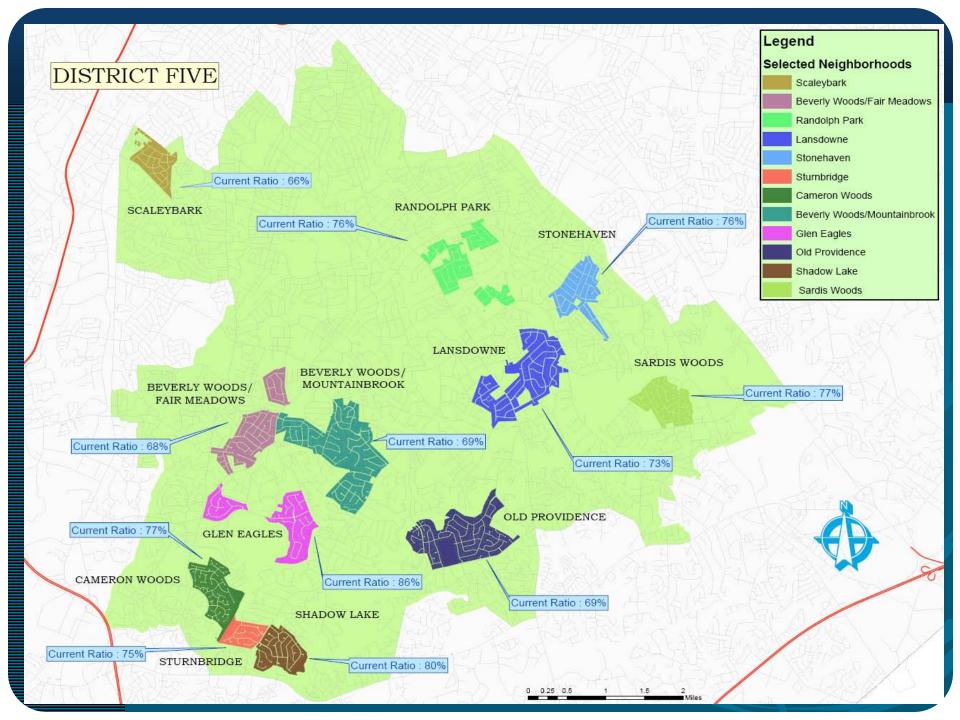

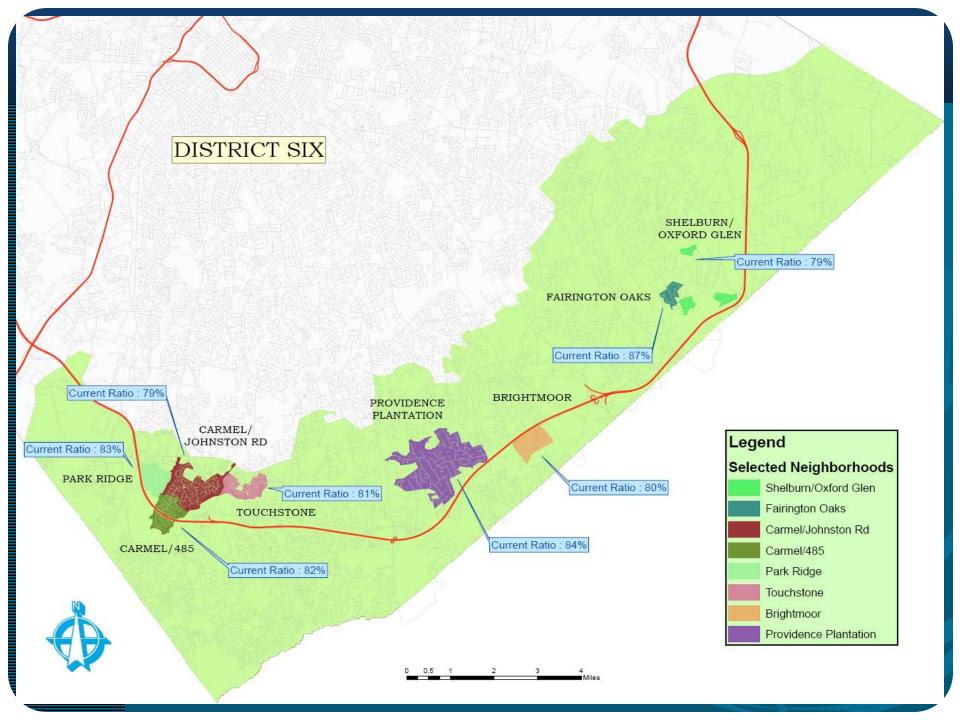

Impact on Taxes

Neighborhoods with the *lowest* current assessment ratios will see increases in assessment in the 2011 Revaluation

Neighborhoods with *higher* current assessment ratios will see less change, or possible reductions from the Revaluation

NOTICE OF REAL PROPERTY ASSESSED VALUE ** THIS IS NOT A BILL **

Mecklenburg County Assessor's Office Real Estate Appraisal Division P. O. Box 31127, Charlotte NC 28231 http://tax.charmeck.org
