**Mecklenburg
County
Profile 2009**

Charlotte Regional
Indicators Project

The Charlotte Regional Indicators Project. *The Charlotte Regional Indicators Project compiles objective, reliable, and relevant measures for the 14-county bi-state Charlotte region on indicators important to the region's quality of life. By measuring the indicators over time and comparing them to state or national data, the Indicators Project provides policy-makers, civic leaders, and the public with a solid foundation for engaging in efforts to address the region's challenges.*

The indicators are organized in ten theme areas:

- *Arts, Recreation, and Cultural Life;*
- *Economy;*
- *Education;*
- *Environment;*
- *Government and Citizen Participation;*
- *Health;*
- *Housing;*
- *Public Safety;*
- *Social Well-Being; and,*
- *Transportation.*

The Charlotte Regional Indicators Project is an initiative of the UNC Charlotte Urban Institute. It is funded in part by Advantage Carolinas, the Foundation for the Carolinas, and the Z. Smith Reynolds Foundation. Indicators are recommended by consensus of Task Forces of regional experts in each of the ten theme areas, and are evaluated by UNC Charlotte Urban Institute researchers for feasibility before indicator data is gathered, added to the Indicators database and incorporated into Indicators Project reports. Indicator data is updated throughout the year as source agencies release the relevant data sets, and is made available on the Indicators Project website. A comprehensive Indicators Report is produced every two years.

More information about the Indicators Project and the most recent comprehensive Indicators Report are available at www.ui.uncc.edu.

Mecklenburg County Profile 2009

The County Profile Reports. *The County Profile Reports present individual county indicator data in a format intended to make it easy to examine relationships between indicators and across themes for a single county. Each County Profile Report begins with a concise summary of indicator highlights for the county, then presents a quick-reference table of the most recent indicator data, and finally provides more detailed indicator trend data in user-friendly charts. The reports are available for each of the region's fourteen counties, and are produced every two years.*

Summary Highlights. For the most recent indicator data, Mecklenburg outpaces the region on all but a few indicators. In these six theme areas, Mecklenburg outperforms the region on nearly all indicators:

- Arts, Recreation, and Cultural Life
- Economy
- Environment
- Government and Citizen Participation
- Health
- Social Well-Being

Mecklenburg lags the region on these individual indicators:

- Crime Index
- 911 Calls
- High School Cohort Graduation Rate
- Solid Waste Disposal Rate

That is, Mecklenburg's Crime Index, 911 Calls and Solid Waste Disposal Rates are *higher* than the regional composite rates, and its High School Cohort Graduation Rate is *lower* than the regional composite percentage.

Looking at trends over time, key Mecklenburg County indicators demonstrating appreciable change over the most recent available five-year time periods include:

- Giving Per Capita (Public Charities) (+71.0%, 2007 vs. 2003)
- Gonorrhea Rate Per 100,000 (-55.1%, 2007 vs. 2003)
- Chlamydia Rate Per 100,000 (-52.2%, 2007 vs. 2003)
- Investigated Workplace Fatalities (-50.0%, 2008 vs. 2004)
- People in Motor Vehicle Accidents, Fatality (+47.3%, 2007 vs. 2001)
- Grants Expenditures Per Capita (+46.9%, 2007 vs. 2005)
- Library Print Holdings Per Capita (-31.5%, 2006 vs. 2002)
- Suicide Rate Per 100,000 (-30.7%, 2007 vs. 2003)
- Minority Infant Mortality Per 1,000 Live Births (-20.8, 2007 vs. 2003)
- White Infant Mortality Per 1,000 Live Births (+19.9, 2007 vs. 2003)
- High School Cohort Graduation Rate (-10.7, 2007-08 vs. 2005-06)

For each indicator for which county-level data is available as of January, 2009, this table presents the most recent data for the county and the region, along with a percent change for the county. County percent change represents a five-year trend wherever possible: it is the percent change from a prior year (the “from year” column) to the most recent data; generally, the “from year” is five years prior. Indicator definitions and data sources can be found at the end of this document. Regional data is calculated as a fourteen county average whenever possible, and exceptions to this are detailed in the endnotes. Unless otherwise noted, “Per 1,000” or “per 100,000” refers to population.

Indicator Trend Data

Mecklenburg County Profile 2009

Demographics

Mecklenburg County is the most populous county in the region. Its population increased over each of the past four decades, and, except for 1970-1980, did so at rates of more than 25 percent per decade. The county's population is projected to continue increasing at similar rates. The county is becoming more ethnically and racially diverse with the white percentage of population decreasing slightly and the percentage of most minorities increasing, especially the Hispanic population. The county's age distribution shifted slightly towards older age groups: in the year 2000, the largest 10-year age group was ages 25 to 34, but in 2007, it was ages 35 to 44.

Arts, Recreation, and Cultural Life

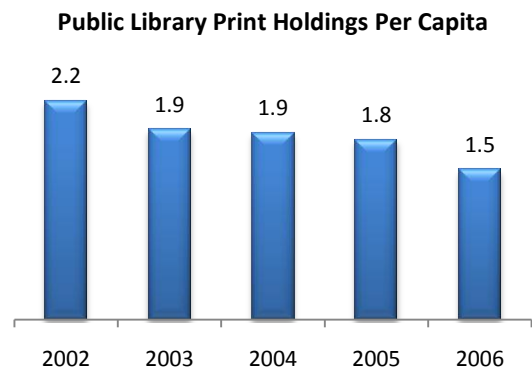

Arts, recreation and cultural activities are measured by four indicators:

- Grants Expenditures;
- Library Holdings;
- Library Funding; and
- Arts Graduates.

Of these, only the first three have county-level data available. Per capita grant expenditures by arts and cultural organizations increased from 2005 to 2007. Government funding for libraries per capita increased slightly from 2004 to 2005, and then dropped below 2004 levels in 2006 and 2007. Public library print holdings per capita declined from 2.2 in 2002 to 1.5 in 2006.

Indicator Trend Data

Mecklenburg County Profile 2009

Economy

The local economy is measured by six indicators:

- Labor Force (Unemployment Rate);
- Industry Employment (Jobs);
- Business Establishments;
- Average Annual Wage;
- Per Capita Income; and
- Median Household Income.

The county's unemployment rate rose from 3% in 2000 to a high of 5.8% in 2002 before declining slowly through 2007 to 4.5%. Total industry employment was at 515,601 jobs in 2000, declined to its lowest amount in 2003 of 501,198 jobs, and increased to a high of 566,198 jobs in 2007. The number of business establishments in Mecklenburg remained fairly stable in the low 27,000's from 2000 to 2004, and then increased since 2005 to 32,034 in 2007. Average annual wage and per capita income increased each year since 2000, while median household income held steady around \$50,000 from 2000 through 2005, then increased to \$56,114 in 2007.

Education

Education is measured by seven indicators:

- Public Schools Enrollment;
- Educational Attainment;
- SAT Scores (Math and Verbal);
- Graduation Rate;
- College Plans;
- Expenditures Per Pupil; and
- Capital Expenditures.

Public school enrollment in Mecklenburg grew at an accelerating pace each school year from 1999-01 to 2005-06, and then slowed in 2006-07. The percentage of college graduates increased relatively steadily from 1990 through 2007.

Average SAT scores rose each year from 2001-02 to 2004-05, and then dropped through 2007-08. The high school cohort graduation rate decreased slightly from 2005-06 to 2006-07, and then decreased by about 10% in 2007-08. The percentage of high school graduates pursuing higher education remained relatively stable from 2000-01 through 2003-04, rose in 2004-05, and then declined slightly again in 2005-06. After a drop from 2000-01 to 2001-02, public school expenditures per pupil rose slightly each year from 2001-02 to 2005-06, surpassing the 2000-01 level in 2004-05. The per pupil capital expenditures indicator is a 5-year average, and data are currently only available for a two 5-year time periods, 2000-01 to 2004-05 and 2001-02 to 2005-06, showing a 13% decline.

Environment

The environment is measured by six indicators:

- Air Quality Index (“AQI”);
- Vehicular Emissions (NOx);
- Water Consumption;
- Impaired Streams;
- Solid Waste Disposal; and
- Developed Acreage.

Of these, county-level data are available for all but AQI Days and Impaired Streams. While multi-year trend data for per capita on-road vehicular emissions are not available, the county’s rate (76.1) is below the regional average (82.8). Per capita average daily water consumption rose almost 10 percent from 1992 to 1997, and then declined a little over 5 percent by 2002. The per capita average annual amount of solid waste sent to landfills decreased slightly from 2004 to 2005, then increased by over 10 percent in 2006, and remained higher through 2007. Developed acres per person rose at an accelerating pace each decade from 1976 to 1996, then stabilized by 2006, and is projected to decline slowly through 2030.

Government and Citizen Participation

Indicators of government and citizen participation focused on five measures of voter turnout and charitable giving:

- Voter Turnout;
- Public Charities;
- Private Foundations;
- Giving to Public Charities; and
- Giving to Private Foundations.

Voter turnout was higher in the 2008 and 2004 presidential election when compared to the 2000 presidential election, but the 2006 mid-term election turnout was

Indicator Trend Data

Mecklenburg County Profile 2009

significantly lower than that in 2002. After a slight drop from 2004 to 2005, the number of registered public charities per 1,000 population remained steady through 2007; however, the corresponding ratios for larger registered public charities (those reporting income greater than \$25,000 on Form 990) and for private foundations declined each year from 2004 to 2007. Per capita giving to both public charities and private foundations shows a generally increasing trend, although giving to private foundations has shown more variability.

Indicator Trend Data

Mecklenburg County Profile 2009

Health

Health is measured by five indicators:

- Birth Rate;
- Infant Mortality Rate;
- Mortality Rate;
- Suicide Rate; and
- Sexually-Transmitted Diseases Rate.

The birth rate remained relatively stable from 2002 through 2007, at around 17.0 births per 1,000 population. Total infant mortality increased from 2003 to 2004, and then decreased through 2007.

Minority infant mortality remained considerably higher than white infant mortality over that time span. Total mortality rates decreased from 2003 to 2007, as did the mortality rates for heart disease and cancer. Suicide rates in Mecklenburg County fluctuated by as much as 30% annually from 2003 to 2007, from 9.7 per 100,000 population in 2003, to 6.7 in 2007.

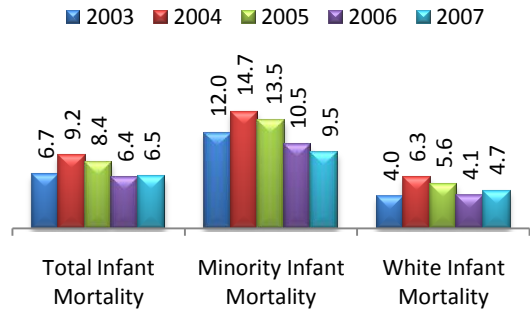

Incidence rates for the sexually-transmitted disease, chlamydia, rose from 2002 to 2005, and then dropped well below 2002 levels by 2007. Incidence rates for gonorrhea declined from 2002 to 2007, with the largest decrease between 2006 and 2007.

Housing

Housing is measured by six indicators:

- Housing Units;
- Housing Types;
- Home Ownership;
- Residential Construction;
- Sales; and
- Rental and Vacancy Rates.

The ratio of housing units to population increased steadily from 2000 through 2007. From 1990 to 2000, the dominant housing types remained single family detached and multi-family; however, both attached and detached single-family housing types gained share of housing type between 1990 and 2000, at the expense of multi-family and other housing types. Owner-occupied housing increased slightly, and conversely, renter-occupied housing decreased slightly, from 1990 to 2007. As measured by housing units permitted per 1,000 persons, residential construction slowed from 2000 through 2003, and was uneven from 2004 to 2007. Construction cost per unit permitted increased steadily from 2000 to 2007. The average residential sales price increased from \$216,841 in 2005 to \$239,758 in

2007. The average apartment rental rate increased from 2000 to 2002, declined through 2005, and then increased annually to a high of \$761 in 2008. The average apartment vacancy rate rose substantially from 2000 to 2004, fell back to 2000 levels by 2007, then increased slightly in 2008.

Public Safety

Public Safety is measured by six indicators:

- 911 Calls;
- Crime Index;
- Vehicle Accidents;
- Workplace Fatalities;
- Public Safety Education; and
- Evacuation Plans and Disaster Preparedness.

Of these, county-level data are available for all except Public Safety Education. Per capita calls for emergency service increased slightly from 2005 to 2006. After decreasing from 2000 to 2002, and then increasing through 2004, the crime rate began declining again through 2007. The number of people in motor vehicle accidents in Mecklenburg County declined, although the number of fatalities increased. Investigated workplace fatalities remained at 8 per year from 2002 to 2004 and have varied from 3 to 7 between 2005 and 2008. As of 2009, Mecklenburg County has in place all nine evacuation planning and disaster preparedness measures.

Social Well-being

Social Well-being indicators include these five measures:

- Poverty Rate;
- Child Poverty Rate;
- Child Abuse;
- Teenage Birth Rate; and
- Elderly Assistance Rate.

The poverty rate for both individuals and families increased from 2000 to 2005, and declined in 2006 and 2007. The percentage of children in poverty also increased from

2000 through 2004, and declined from 2005 to 2007. The percentage of substantiated reports of child abuse remained steady. The teenage birth rate fluctuated around 3.1% from 2001 through 2007. The county's percentage of elderly needing assistance with daily activities decreased from 2000 to 2005, but slowly increased from 2005 to 2007.

Transportation

Transportation is measured by four indicators:

- Commuting Alone;
- Average Travel Delay;
- Commute Time; and
- Airport Travelers.

Of these, only two are represented at the county level: Commuting Alone, and Commute Time. Mecklenburg County's percentage of workers driving to work alone fluctuated around 78% from 1990 through 2007. Workers commuting more than 25 minutes increased considerably from 1990 to 2000, but decreased from 2000 to 2006, and then increased again in 2007.

Definitions are listed by theme area, with the indicator's "short name" shown first, followed by the "long name" and/or explanation of how the indicator is calculated.

Demographics

Annual Population Estimates: Measures the annual estimate of population.

Decennial Population and Projections: The measurement of past population and future population projections on a decennial basis.

Percent Population Growth: This indicator measures the annual percentage growth of the population from the previous year.

Race and Ethnicity: This indicator measures the composition of both race and ethnicity for the population.

Age Distribution: Age Distribution looks at the range of ages for the population.

Arts, Recreation, and Cultural Life

Grants Expenditures: Dollars per capita in state and federal appropriations awarded to arts and cultural organizations through the North Carolina Arts Commission and the South Carolina Arts Commission.

Library Holdings: Per capita number of public library print holdings and print serial subscriptions (excluding electronic documents.)

Library Funding: Per capita government funding for public libraries (excluding libraries at state universities or colleges.)

Arts Graduates: Annual number of undergraduate and graduate degree completions in the arts, music and theater from all institutions of higher education in the region, including private and public universities, technical and community colleges and other colleges.

Economy

Labor Force: The civilian workforce is the number of workers employed or looking for work, including members of the military. The labor force unemployment rate is the ratio of the number of unemployed to the total civilian workforce.

Industry Employment: Total Employment, All Industries is the total number of jobs across all industry classifications. Employment by Industry is the number of jobs in each industry sector by the North American Industry Classification System's standard two-digit sector codes.

Business Establishments: Business Establishments, All Industries, is the total number of physical locations of businesses in all industry classifications; note that a business may have more than one physical location, each of which counts as a "business establishment." Business Establishments by Industry is the number of business establishments in each industry sector by the North American Industry Classification System's standard two-digit sector codes.

Average Annual Wage: Average Annual Wage, All Industries is the annual total wages across all jobs, divided by total number of jobs in all industry classifications. Average Annual Wage by Industry is the annual total wages in jobs in a given industry sector (defined by the North American Industry Classification System's standard two-digit sector codes) divided by the total number of jobs in that same industry sector.

Per Capita Income: Total personal income divided by total population.

Median Household Income: Median Household Income is the income of the particular household for which there are an equal number of households with more income and of households with less income.

Education

Public School Enrollment: Public School Enrollment is the percentage change in public school enrollment from the previous school year, by school district and for the region. The enrollment data includes students from pre-kindergarten through grade 12.

Education Attainment: This indicator measures the percentage of the working-age population (age 25 and older) with a bachelor's degree or higher.

Data Definitions

Mecklenburg County Profile 2009

SAT Scores: Examines the average Scholastic Aptitude Test (SAT) score as a percentage of the U.S. average score, for each of the region's 21 school districts and for the region as a whole. Average scores are published both for individual high schools and for school districts, based on scores of all students taking the SAT in a given year. Students taking the SAT are mostly juniors in high school, but can include some sophomores and seniors as well.

Graduation Rate: The figures are the four-year cohort graduation rate, which reflects the number of graduating seniors in a given year as a percentage of the number of enrolled ninth graders from three years prior – in effect, it is the percent of ninth graders who graduate four years later.

College Plans: This indicator tracks the higher-education plans of high school seniors for the year after they graduate from public high schools. Percentages are calculated for students planning on attending two-year, four-year or community colleges, and for those with no plans for higher education (this may include military service).

Expenditures Per Pupil: This indicator measures expenditures per pupil in public schools, excluding capital expenditures. A regional figure was estimated for each school year by multiplying expenditures per pupil by enrollment figures for each school district. The sum of total expenditures across all districts was divided by the total regional enrollment to estimate the regional expenditure per pupil.

Capital Expenditures: Public school capital expenditures per pupil are measured both for school districts and the region. A five-year average is calculated because capital spending by school districts fluctuates significantly from year to year. Total capital expenditures were divided by total enrollment to produce an annual per pupil capital expenditure for each school year. Those annual figures were then averaged to produce an average per pupil capital expenditure in public education for the five-year period.

Environment

Air Quality Index: The percentage of Air Quality Index (AQI) days per year in the “Unhealthy” ranges for the Charlotte-Gastonia-Rock Hill Metropolitan Statistical Area (MSA). The EPA calculates a daily AQI based on the measurement of five major air pollutants regulated by the Clean Air Act, as recorded at approximately 4,000

monitoring stations across the country. The five pollutants are: ground-level ozone, particle pollution (also known as particulate matter), carbon monoxide, sulfur dioxide and nitrogen oxides (NO_x). A daily index value is calculated for each air pollutant measured. The highest of those index values is the AQI value, and the pollutant responsible for the highest index value is the “Main Pollutant.”

Vehicle Emissions: This indicator measures on-road vehicular emissions of nitrogen oxides (NO_x) in the 14-county region. States are required by the EPA to collect and report emissions data every three years.

Water Consumption: The indicator examines local water system use in average gallons per day per person served by the water systems. This indicator includes only the use of water by local water systems filing reports with the states, and excludes water used for agriculture or power generation, water drawn from individual wells and permitted water intakes by residential or industrial water consumers. These local water systems include municipal, county, and private water systems.

Impaired Streams: This indicator measures looks at impaired stream miles as a percentage of total stream miles in the 11 North Carolina counties in the Charlotte region. It also examines monitoring sites reporting impaired streams in the three South Carolina counties in the region.

Solid Waste Disposal: The Solid Waste Disposal indicator quantifies the disposal of municipal solid waste (MSW) and construction and demolition (C&D) debris. Both states adjust their county-level data to exclude waste “imported” from other places and to include waste “exported” to other places, providing a measure of waste generated from within each county that is disposed at landfills, regardless of where the disposal occurs.

Developed Acreage: This indicator measures developed land in acres per person. Developed acres include both residential and nonresidential development, excluding agriculture, and are assessed using satellite imagery, taken at roughly 10-year intervals from 1976 to 2006.

Government and Citizen Participation

Private Foundations: Private Foundations are registered 501(c)(3) private foundations that have filed Internal Revenue Service (IRS) Form 990. Foundations designated as 501(c)(3) organizations under the Internal Revenue Code are exempt from

Data Definitions

Mecklenburg County Profile 2009

federal income taxes because they are operated solely for religious, charitable, scientific, public-safety (testing), literary or educational purposes; amateur sports competition or for the prevention of cruelty to children or animals.

Public Charities: Public Charities are registered 501(c)(3) public charities in the region, including those that have filed an Internal Revenue Service (IRS) Form 990. Public charities designated as 501(c)(3) organizations under the Internal Revenue Code are exempt from federal income taxes because they are operated solely for religious, charitable, scientific, public safety (testing), literary or educational purposes; amateur sports competition or for the prevention of cruelty to children or animals.

Giving (Public Charities): This indicator measures the amount of contributions, gifts, and grants given to 501(c)(3) public charities located in the region and filing Internal Revenue Service (IRS) Form 990.

Giving (Private Foundations): This indicator measures the amount of contributions, gifts and grants received by 501(c)(3) private foundations located in the region and filing Internal Revenue Service (IRS) Form 990.

Voter Turnout: This indicator represents the percentage of registered voters who voted in election years 2000, 2002, 2004 and 2006.

Health

Mortality Rate: Mortality Rates are calculated as the number of deaths per 100,000 population. Mortality Rates for heart disease and cancer were also calculated.

STD Rate: These indicators report sexually transmitted disease rates for Gonorrhea and Chlamydia as the number of cases per 100,000 persons.

Infant Mortality Rate: Infant Mortality Rates reflect deaths of infants aged one year or younger per 1,000 live births. The data also compare infant mortality rates for minorities and whites.

Birth Rate: Birth Rate measures the number of live births reported per 1,000 persons.

Suicide Rate: Suicide Rate is reported as deaths by suicide per 100,000 persons.

Housing

Housing Units: The indicator represents the number of housing units per capita and includes all types of residential development, encompassing single-family homes, apartments, condos, townhomes and all other housing types.

Housing Types: Housing Types include single-family detached, single-family attached (row houses or townhomes), multi-family units, mobile homes and all other housing (such as boats, RVs and vans).

Home Ownership: Home Ownership measures owner-occupied and renter-occupied housing as a percentage of occupied housing units.

Residential Construction: This indicator measures the number of housing units for which building permits were issued. The indicator is expressed as housing units per 1,000 persons.

Sales: This indicator measures the rate of residential real estate closings (the number of closings per 1,000 persons) and the average price of such home sales for single-family homes, condominiums and townhomes.

Rent and Vacancy Rates: The apartment vacancy rate is the percent of all apartments that are vacant as of the date of the survey call on that certain day. The rental rate is the average rent in dollars per month.

Public Safety

911 Calls: This indicator measures the annual per capita calls for 911 Emergency Service.

Crime Index: This indicator measures the number of crimes per 10,000 persons. It is the sum of the crime rates per 10,000 persons for seven categories of crimes: murders, rapes, robberies, aggravated assaults, burglaries, larcenies and motor-vehicle thefts.

Vehicle Accidents: People in Motor Vehicle Accidents measures the total number of people in motor-vehicle accidents and whether the accidents involved a fatality, non-fatal injuries, or property damage only.

Workplace Fatalities: This indicator examines the number of workplace fatalities in the region that have been investigated or are under investigation.

Public Safety Education: Public Safety Education looks at the number of colleges and universities in the 14-county region with a two- or four-year

Data Definitions

Mecklenburg County Profile 2009

degree in criminal justice, fire safety or emergency-medical training.

Evacuation Planning: Evacuation Planning addressed evacuation plans and disaster preparedness through a survey designed by the UNC Charlotte Urban Institute. Survey questions concerned reverse 911 systems, radio interoperability, disaster training, disaster response and evacuation plans, mutual-assistance agreements, and related topics.

Social Well-being

Poverty Rate: This indicator measures the percentage of families and individuals in the region living in poverty. "Living in poverty" is defined by federally-determined income thresholds verifying what is needed to feed, clothe and economically sustain an individual or families of specified sizes (for example, "a family of four".) Any family or individual whose income does not reach the threshold amount is considered to be in poverty.

Child Poverty: Child Poverty measures the percentage of children under the age of 18, living at or below the poverty level. "Living in poverty" is defined using federally-defined poverty thresholds.

Child Abuse: Child Abuse measures substantiated reports of child abuse or neglect per county for the fiscal year. It represents only the percentage of abuse and/or neglect reports made to each county's child protective services that are substantiated by those agencies, based on investigative findings.

Teenage Birth Rate: Teenage Birth Rate measures the number of births to mothers under the age of 18 as a percent of all births.

Elderly Assistance Rate: This indicator measures the percentage of individuals age 65 or older who require assistance in performing Activities of Daily Living (ADL). Activities of Daily Living include eating, dressing, bathing, personal hygiene-related tasks, transfers (the ability to get in and out of a bed or chair), ambulation and communication.

Transportation

Commuting Alone: This indicator measures the percent of workers 16 or older who drive to work alone by car, truck or van.

Average Travel Delay: This section focuses on travel delays during peak travel times – considered to be from 6 a.m. to 9 a.m. and from 4 p.m. to 7

p.m. The figures are calculated by dividing the number of extra travel hours by the number of peak period travelers in an urban area. The average annual travel delay per peak traveler is the yearly sum of delays per peak trip, divided by the number of travelers who started a trip during the peak period.

Commute Length: Commute Length measures the percentage of workers 16 or older not working at home who commute more than 25 minutes.

Airport Travelers: This indicator measures the number of passengers boarding planes ("enplanements") and disembarking from planes ("deplanements") at Charlotte/Douglas International Airport. Passengers making connecting flights at Charlotte/Douglas are included in these figures.

Endnotes

Mecklenburg County Profile 2009

¹Indicator data at the regional level was calculated whenever possible as a weighted average of the source data for all 14 counties. However, in the following instances, the regional figure is calculated differently:

Library Print Holdings Per Capita: Region Number represents 13 of 14 counties excluding Anson

Median Household Income: Region Number represents North Carolina state average

Percent Population with Bachelors Degree or Higher: Region Number represents 11 of 14 counties excluding Anson, Chester and Stanly

High School Cohort Graduation Rate: Region Number represents the 11 North Carolina counties

Average Daily Water Consumption, Gallons Per Capita: Region Number represents the 11 North Carolina counties

Solid Waste Disposal, Pounds Per Capita: Region Number represents the 11 North Carolina counties

Percent Voter Turnout of Registered Voters: Region Number represents the 11 North Carolina counties

Birth Rate Per 1,000: Region Number represents the 11 North Carolina counties

Total Infant Mortality Per 1,000 Live Births: Region Number represents the 11 North Carolina counties

White Infant Mortality Per 1,000 Live Births: Region Number represents the 11 North Carolina counties

Minority Infant Mortality Per 1,000 Live Births: Region Number represents the 11 North Carolina counties

Total Mortality Rate Per 100,000: Region Number represents the 11 North Carolina counties

Heart Disease Mortality Rate Per 100,000: Region Number represents the 11 North Carolina counties

Cancer Mortality Rate Per 100,000: Region Number represents the 11 North Carolina counties

Suicide Rate Per 100,000: Region Number represents the 11 North Carolina counties

Chlamydia Rate Per 100,000: Region Number represents the 11 North Carolina counties

Gonorrhea Rate Per 100,000: Region Number represents the 11 North Carolina counties

Percent Owner Occupied Housing: Region Number represents 11 of 14 counties excluding Anson, Chester and Stanly

Percent Renter Occupied Housing: Region Number represents 11 of 14 counties excluding Anson, Chester and Stanly

Average Residential Sales Price: Region Number represents 7 of 14 counties excluding Anson, Catawba, Chester, Cleveland, Lancaster, Rowan and York

Average Apartment Vacancy Rate: Region Number represents 6 of 14 counties excluding Anson, Catawba, Chester, Cleveland, Lancaster, Lincoln, Rowan and Stanly

Average Apartment Rental Rate: Region Number represents 6 of 14 counties excluding Anson, Catawba, Chester, Cleveland, Lancaster, Lincoln, Rowan and Stanly

Calls for Emergency Service (911) Per Capita: Region Number represents 11 of 14 counties excluding Anson, Lancaster and Union

Crime Index Per 10,000: Region Number represents the 11 North Carolina counties

People in Motor Vehicle Accidents, Total: Region Number represents the 11 North Carolina counties

People in Motor Vehicle Accidents, Property Damage Only: Region Number represents the 11 North Carolina counties

People in Motor Vehicle Accidents, Fatality: Region Number represents the 11 North Carolina counties

People in Motor Vehicle Accidents, Non-fatal Injury: Region Number represents the 11 North Carolina counties

Endnotes

Mecklenburg County Profile 2009

Investigated Workplace Fatalities: Region Number represents the 11 North Carolina counties

Percent Individuals Living in Poverty: Region Number represents 11 of 14 counties excluding Anson, Chester and Stanly

Percent Families Living in Poverty: Regional Number represents 10 of 14 counties excluding Anson, Chester, Lancaster and Stanly

Percent Births to Mothers Under Age 18: Region Number represents the 11 North Carolina counties

Elderly Assistance Rate: Region Number represents 11 of 14 counties excluding Anson, Chester, and Stanly

Percent of Workers 16 or Older Driving to Work Alone: Region Number represents 11 of 14 counties excluding Anson, Chester and Stanly

Percent of Workers Commuting More Than 25 Minutes: Region Number represents 11 of 14 counties excluding Anson, Chester, and Stanly

² For Percent Change in Public School Enrollment vs. Prior Year, the 'County Percent Change' column contains the five year percent change in enrollment (that is, the most recent year's enrollment is compared to enrollment from four years prior) instead of the five year percent change in the percent change in enrollment (comparing the most recent change to the percent change of four years ago).
